PATENT
Filed: August 2, 2001

1. (previously presented) A method for storing Internet advertisements at a user computer, comprising the acts of:

receiving plural Internet advertisements at the user computer automatically without the user requesting them;

saving at least plural advertisements at the user computer;

allowing a user to access saved advertisements in an advertising history window displaying Internet content composed of plural advertisements;

allowing a user to filter previously displayed advertisements, so that only advertisements corresponding to one or more user selected attributes are eligible for display;

wherein the saved advertisements include at least one link to a website and the method further comprises:

recalling a user-selected saved advertisement, the saved advertisement having at least one link to a website; and

accessing the website from the saved advertisement when the link is toggled.

2. (previously presented) The method of Claim 1, wherein the advertisement includes a tag that is a Hypertext Markup Language (HTML) tag.

3. (original) The method of Claim 1, further comprising the act of:

displaying a button; and

in response to the button being toggled, displaying the saved advertisement.

4. (original) The method of Claim 3, wherein plural advertisements are saved and the method further comprises:

allowing the user scroll through the saved advertisements.

5. (canceled).

6. (previously presented) The method of Claim 1, further comprising the acts of:

displaying a previous button in the advertising window;

displaying a next button in the advertising window; and

accessing saved advertisements when the previous button and next button are toggled.

7-12 (canceled).

13. (currently amended) ~~The system of Claim 8~~ A system for saving at least one Internet advertisement at a user computer comprising:

at least one Web server;

at least one database connected to the server, the database storing plural Internet advertisements;

at least one user computer connected to the server via an Internet connection, the server transmitting the Internet advertisements to the user computer while the user is engaged in activity other than requesting the advertisements, the user computer including a program for saving at least one Internet advertisement, the program displaying plural saved advertisements simultaneously in an advertisement window such that a user may select a saved advertisement from the window for display on the user computer;

wherein the saved advertisements include at least one link to a website and the program further comprises:

logic means for enabling a user to select a saved advertisement for display thereof,

the saved advertisement having at least one link to a website;

logic means for accessing the website from the saved advertisement when the link is
toggled;

logic means for receiving plural Internet advertisements;

logic means for saving at least one advertisement at the user computer, wherein the program
further comprises:

logic means for displaying a previous button;

logic means for displaying a next button; and

logic means for accessing saved advertisements when the previous button and next
button are toggled.

14. (previously presented) A computer program device, comprising:

a computer readable means having logic means for storing at least one Internet advertisement,
comprising:

logic means for receiving plural Internet advertisements at a user computer, the
advertisements being sent to the user computer automatically in response to a user request for
information other than the advertisements;

logic means for saving advertisements at the user computer;

means for allowing a user to select saved advertisements in an advertisement history window
displaying Internet content composed only of advertisements;

means for enabling a user to recall at least one user-selected advertisement; and

means for accessing the website from the saved advertisement when the advertisement is toggled.

15. (previously presented) The computer program device of Claim 14, wherein an advertisement includes a Hypertext Markup Language (HTML) tag.

16. (original) The computer program device of Claim 14, wherein the computer readable means further comprises:

logic means for displaying a button; and

logic means for displaying the saved advertisement in response to the button being toggled.

17. (original) The computer program device of Claim 16, wherein plural advertisements are saved and the computer readable means further comprises:

logic means for allowing the user scroll through the saved advertisements.

18. (original) The computer program device of Claim 16, wherein the saved advertisements include at least one link to a website and the computer readable means further comprises:

logic means for receiving plural Internet advertisements, at least one advertisement including a tag; and

logic means for saving at least one advertisement at the user computer at least partially based on the tag.

19. (original) The computer program device of Claim 14, wherein the computer readable means further comprises:
